New PRO Series of Flat-Panel Mounts Finds Solution for Every Application

New and updated offerings are ideal for wall, ceiling and floor stand applications and fit a broad range of display sizes and weights

ANAHEIM, CALIF. (June 10, 2009) – In the end, form and functionality win and are the most essential components of mounting solutions for the professional market. The new PRO Series of flat-panel mounts from Premier Mounts has both. A full line of mounts and accessories for hotels, casinos, schools, theaters, restaurants and more, the new flat-panel mount series includes wall, ceiling and floor stand mounts ideal for any application.

First appearing at InfoComm 09 in Orlando, the PRO Series boasts a combination of existing, updated and new products and accessories that Premier Mounts' dealers and installation experts will appreciate. All mounts in the PRO Series hold flat-panel TVs ranging from 24 to 108 inches and up to 600 lbs.

“Needs across the professional market for mounting solutions are varied and constantly changing as businesses become more innovative with their use of flat-panels and projectors. We've had to refine and add to our product lines to accommodate these ever-changing requirements,” said Eric Mancini, product manager at Premier Mounts. “The PRO Series mounts include a wide array of features and solutions, but all promise the same sturdy, secure, easy-to-use characteristics that ensure less hassle, less wasted time and no unnecessary headaches.”

Available for purchase through www.mounts.com, or through a certified Premier Mounts dealer, the PRO Series features several of the lowest profile mounts manufactured, and includes products to fit nearly every application:

- Wall mounts – Available in tilt and pivot or flat mount applications, most wall mounts are less than 2 inches deep, provide cable and junctionbox access, allow for lateral shift and have a post-mount leveling system for easy installation. The PRO Series of wall mounts also includes the world's thinnest adjustable flat mount for space-constrained applications.
- Ceiling mounts – Specific mounts in the PRO Series, including the CTM series, are designed for mounting flat-panel displays to ceiling adapters. The mount uses Premier Mounts' Griplate™ System which supports the appropriate mounting

hardware without needing excessive torque. Optional theft-resistant PaneLock™ also is available to help prevent unauthorized display removal.

- Cart or stand mounting – Limited mounts within the PRO Series are designed for dual-pole cart or stand mounting. Mounts in this category fit display sizes from 24 inches to more than 60 inches and up to 300 lbs.

About Premier Mounts

For more than 30 years, Premier Mounts has been at the forefront of the audio/visual industry, creating solutions that have opened new opportunities for the use of A/V technology in homes, businesses and educational institutions. A global leader in developing and delivering innovative supporting solutions for projectors and flat-panel displays, Premier Mounts pioneered the concept of the universal mount.
