Very Well Connected™

- You must read and follow all of these installation instructions. Failure to follow all of these installation instructions may result in serious bodily injury or death.
- Keep these installation instructions with the product and readily available in the vehicle for future reference of other users of the product.
- Additional copies of the installation instructions can be obtained from Gamber Johnson.
- If you need assistance or have any questions, call Gamber-Johnson at 1-800-456-6868.
- Do not remove warning label from product under any circumstances.
- Before installation of any equipment always check area for routing of wires / cables and if drilling is required check area where drilling above and below the drilling area.
- High speed vehicle turns may cause a motion attachment product to swivel, interfering with the driver or other equipment.
- The Vehicle Base, Upper Pole, Motion Attachment and Dock or Cradle should not be positioned in the area where the airbag will be deployed if it is activated. DO NOT position the equipment in front of an airbag. Equipment positioned in front of an airbag can cause serious injury or death if and airbag was activated, such as in an accident.
- The installer and user of this product(s) are responsible for installing and using Upper Pole, Motion Attachment and Dock or Cradle assemblies outside the airbag deployment zone. (See Product Mounting Disclaimer Below)
- If installation of the equipment requires that the equipment be placed in front of an airbag, deactivate the airbag in the vehicle so it cannot be activated in an accident. In order to secure permission for deactivating the airbag in these circumstances, contact the National Highway Traffic Safety Administration at 1-800-424-9393 to gain permission to do so. If you have any questions or need assistance, call Gamber Johnson at 1-800-456-6868.

**INSTALLATION INSTRUCTIONS:**

1. Remove the two front seat bolts with a T-50 bit. See Figure 1.
2. Slide the base between the seat mounts and the floor. See Figure 2
3. Put the seat bolts back but do not completely tighten them (this would allow some flexibility/movement for completing the installation of the base).
4. With a hex head bolt and washer provided, through the slot in the top of base, attach the L-bracket to the base. Again do not completely tighten the bolt. See Figure 3.
5. Now, align the holes of the L-bracket with the rectangular holes of the seat mount and the base pems. Bolt the remaining hardware through these holes and tighten them completely. See Figure 1 and Figure 3.
6. Tighten the hex head bolt on the top and finally tighten the seat bolts.
7. The base is now ready to install the lower pole, upper pole and motion attachments etc. See Figure 2.
8. Use the remaining hardware to install a pole to the base.

Figure 1

Figure 2

Figure 3

**Notes:**

1. Installing the vehicle base might result in reducing the passenger seat travel.
