

INSTALLATION INSTRUCTIONS

Product

DS-57

Flat Floor Base

Revision

Rev.A

Form

INST-15

Printing Spec: PS-001

1. If it is desired to cover the bottom of the base with the carpet or floor mat, lay the material back to expose the bare floor.
2. Place the base in the passenger footwell with the post in the corner closet to the hump and the seat. Move the base around until the best post location is determined. Mark the mounting hole locations, and note whether it will be necessary to shim any corner with washers to compensate for floor irregularities.
3. Drill 1- 13/32" hole at each mounting hole location, using care not to damage any equipment below the floor. Most bases have holes for 3/8" bolts, but holes for 1/2" bolts are furnished in the taller bases.
4. Place bolts, washers and nuts in all holes, shimming as necessary with fender washers, and tighten. Do not use lag screws or sheet metal screws as these can pull out of the floor.
5. The height is adjustable by loosening the bolt at the top of the post one turn. If necessary, tap lightly on the top of the bolt to release the top plate. Adjust the height and direction of the top plate and retighten the bolt.

Product Mounting Disclaimer

Gamber-Johnson is not liable under any theory of contract or tort law for any loss, damage, personal injury, special, incidental or consequential damages for personal injury or other damage of any nature arising directly or indirectly as a result of the improper installation or use of its products in vehicle or any other application. In order to safely install and use Gamber-Johnson products full consideration of vehicle occupants, vehicle systems (i.e., the location of fuel lines, brakes lines, electrical, drive train or other systems), air-bags and other safety equipment is required. Gamber-Johnson specifically disclaims any responsibility for the improper use or installation of its products not consistent with the original vehicle manufactures specifications and recommendations, Gamber-Johnson product instruction sheets, or workmanship standards as endorsed through the Gamber-Johnson Certified Installer Program.
