**CLAMP BRACKET ADAPTER**

**Printing Spec:PS-001**

The 7160-1096 Clamp adapter bracket is designed to mount to existing roll formed overhead guard leg clamp brackets that are used on forklifts with enclosed cabs. Linde is an example of a manufacturer that uses overhead guard leg clamp brackets on their H30T forklift. Some clamp brackets are used as door latches and can also be used to mount the clamp bracket adapter (See Figure 1 below). If your specific vehicle does not have a door latch clamp bracket, you will need to obtain a set of brackets from your forklift distributor.

## **Attaching the adapter to the clamp bracket:**

1. Attach the adapter to the door latch or other clamp bracket with the M8 hex bolts and flat washers provided in hardware bag 7120-0822. **Note: Check the threads on the clamp bracket to verify M8 is correct for your specific vehicle.**
2. 3/8" hardware has been provided in hardware bag 7120-0822 for attaching a 7160-0371 clam shell.
