**TOYOTA CAB MOUNT FOR FORKTRUCK
WITH ELECTRIC HYDRAULICS**

Revision

Rev.A

Form

INST-848

Printing Spec:PS-001

The 7160-1151 Toyota cab mount replaces the existing door latch bracket on a Toyota forklift with electronic hydraulics. This will allow the end user to mount a docking station or cradle in this location.

Attaching the cab mount

1. Remove the current latch bracket (with door pin attached) by removing the (2) 8mm mounting screws.
2. Remove the door latch pin from the existing bracket and attach it to the new latch bracket supplied by Gamber-Johnson. Position the door pin in roughly the same location it was positioned on the original bracket.
3. The mounting plate and latch bracket have multiple holes positions to adjust the height of the bracket. Pick the height that best fits your application.
4. Attach the cab mount to the overhead guard leg with the (2) 8mm bolts removed in step 1. The latch bracket has vertical slots so the height can be adjusted to fit the door latch correctly.
5. An optional material handling motion attachment (ie. 7160-0420 or 7160-0366) can now be added to the mount to hold the device being mounted.

Product Mounting Disclaimer

Gamber-Johnson is not liable under any theory of contract or tort law for any loss, damage, personal injury, special, incidental or consequential damages for personal injury or other damage of any nature arising directly or indirectly as a result of the improper installation or use of its products in vehicle or any other application. In order to safely install and use Gamber-Johnson products full consideration of vehicle occupants, vehicle systems (i.e., the location of fuel lines, brakes lines, electrical, drive train or other systems), air-bags and other safety equipment is required. Gamber-Johnson specifically disclaims any responsibility for the improper use or installation of its products not consistent with the original vehicle manufactures specifications and recommendations, Gamber-Johnson product instruction sheets, or workmanship standards as endorsed through the Gamber-Johnson Certified Installer Program.
