

# INSTALLATION INSTRUCTIONS

<u>Product</u>	<u>Revision</u>	<u>Form</u>
7160-0962, 7160-0978	Rev A	INST-788
LED LIGHTING KITS		Printing Spec: PS-001

## Console Box LED Lighting Kit - 7160-0962

### To install:

1. First install the LED light bracket onto the console box top plate. The bracket can be installed by itself using the 1/4-20 hardware included or underneath a motion attachment. Note that the bracket can be flipped over to be installed on either the driver or passenger side of the console box top plate. The bracket can also be shifted forward or backward 1" to provide more or less overhang. Pushing the bracket back farther may interfere with top plate edge trim.
2. Remove the adhesive liner on the LED light clip and attach the clip to the bottom side of the light bracket. See FIG 1.
3. With the console box top plate bolts removed the wires can be routed inside the box through the bend in the top plate. See FIG 1.

### Workstation LED Lighting Kit - 7160-0978

**To install:**

1. Remove the adhesive liner on the LED light clip and attach the light inside the workstation on the angled flange near the front. See FIG 2.
2. The included switch can be placed in either rectangular knockout just above the light's location.

**NOTE:** Run the wires through the knockout to the switch and test the circuit before snapping the switch into place.

3. To wire the light and the switch included refer to the wiring diagram on the following page. Spade connectors for the switch as well as butt splice connectors are included. Wiring from the light to the switch, ground or power source is not provided. The mounting flange has holes for cable ties to assist in cable management. See FIG 2.
