END-OF-LIFE POLICY

Product Life Cycle Overview and EOL Notifications

Periodically, Gamber-Johnson may find it necessary to discontinue products for a number of reasons, including decline in competitiveness, or decreased sales of a product. Obsolescence can also occur because a newer version of a product has become available. Finally, products may become obsolete if replacement parts are no longer available, or when the cost of replacement parts or repairs is higher than the cost of a new item.

Gamber-Johnson is committed to making the transition from such products to new offerings as simple as possible. As part of this, when a product reaches its end of life (EOL), Gamber-Johnson will move the product from its current product category and place it into the discontinued category under the Products tab. Gamber-Johnson will include the initial EOL notification, Last Order Date (LOD), and End-of-Support (EOS) milestone dates, as described below.

Resellers may continue to purchase product up until the LOD. Gamber-Johnson will honor our Limited Lifetime Warranty as long as it is purchased no later than the LOD. Gamber-Johnson will continue to provide technical support and service for product up until the announced EOS date (based on warranty). In the event that a product or its parts are no longer available during the warranty period, Gamber-Johnson will replace the item with a comparable product if available. Please note that some components are dependent on OEM availability (example: Panasonic boards and components used in docking stations) and replacement parts are dependent on their product offering.

END-OF-SUPPORT (EOS) POLICY

Mounting Systems (non-electronic)

Gamber-Johnson is committed to providing service/repair on your mounting system for the life of the product within the warranty policy guidelines. We will repair, replace with an equivalent product, or refund your purchase price of any defect found in material or workmanship of any nonconforming product.

Docking Stations and Electronic Products

Gamber-Johnson is committed to providing service/repair on all mobile docking stations for a minimum of five (5) years after last order date LOD. Our ability to provide this service is dependent on availability of electronic products from our OEM suppliers.

The electronic products listed on the next page are no longer serviced/supported by Gamber-Johnson

Gamber-Johnson will service electronic products up to 5 years after the product is End-of-Life (EOL). This is, however, dependent on OEM availability of electronic components.
